

Facilitator Cohort License Guide

Run coding clubs, bootcamps, and school workshops with a ready-made reflection and portfolio system.

Designed for Ghanaian high-school and university learners in coding, AI, data, cybersecurity, and digital-skills programs. Independent resource. Not an official government product.

Best use cases

- 2-hour intro workshop
- 7-day coding challenge
- 4-week club sprint
- 12-week bootcamp or course
- university tech society portfolio clinic

Suggested cohort pricing

Starter cohort: GHS 300 for up to 25 learners.

Growth cohort: GHS 750 for up to 100 learners.

Institution cohort: GHS 1,500 for up to 250 learners.

Large program: GHS 3,000 for up to 750 learners.

Workshop flow

Time	Activity
0-10 min	Why portfolio proof matters more than passive course completion.
10-25 min	Show examples of a weak learning note vs a strong project note.
25-45 min	Learners complete their first project reflection.
45-65 min	Prompt log exercise: improve one AI prompt and explain the change.
65-90 min	Pair review: each learner explains one project story.
90-120 min	Commitment: choose one portfolio improvement for the next 7 days.

Assessment rubric

Area	What to look for
Clarity	Can the learner explain the project problem and outcome?
Evidence	Are screenshots, links, code, or notes included?

Reflection	Does the learner explain mistakes and improvements?
AI use	Does the prompt log show judgment and adaptation?
Next step	Is there a clear plan for improving the project?
